

# TPC Hackathon -

## Christos-BE-Alessandro

Alessandro U. - TU Delft  
Beshr Al N. - Chalmers  
Christos P. - Chalmers

# Solution Sketch

- Replace dynamic allocations with static
  - Issues with allocation so we got big MSE
- Make the relevant structures persistent
- Divide into tasks by using a switch - case and a persistent variable
- Other Ideas:
  - Treat the the Network data as binary and push it to FRAM

# Feedback

- + Most talks are interesting
- + We love the idea of having a hackathon and meeting with people
  - But not spending time on cleaning code instead of focusing on the relevant
- ++ We would love to have another school / hackathon
